In-Class Assignment L1-1: Quilt of Hexagonal Patches (Group of 2 to 3)

(15 minutes) Design an algorithm to determine the number of blue patches in the Quilt of hexagonal patches problem. Write the algorithm in a piece of paper or a tablet.

(10 minutes) Exchange your work with a nearby group.

(i) Determine if the algorithm of the other group meets the five essential properties of algorithm.
(ii) Determine if the algorithm of the other group works correctly.
(iii) Write down your feedbacks/comments for (i) and (ii) if needed and give it back.

Submit your work + feedbacks/comments (pdf, screenshots, photos) to LEB2
