In-Class Assignment L5-1 (Group of Six or Less): Ford-Fulkerson Method

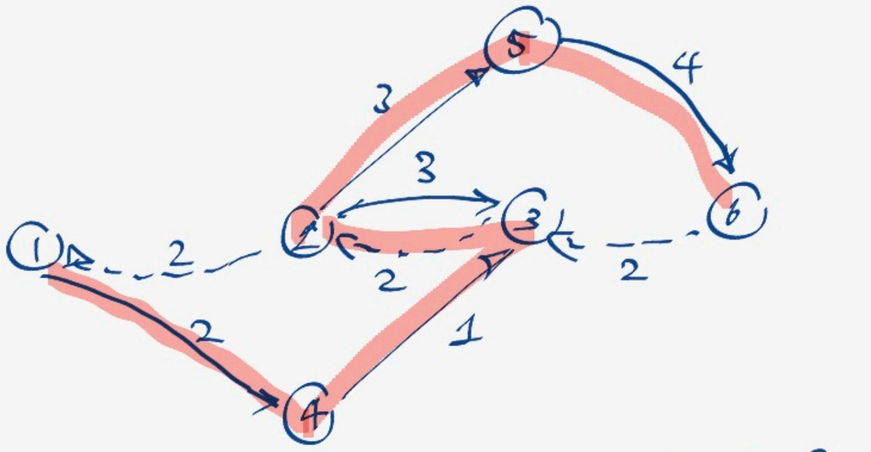

(25 minutes) Submit to LEB2

Consider the flow network below. Find the largest flow value from Node 1 to Node 6 using Ford-Fulkerson method. In each iteration, draw the residual graph and simple path you use to augment the flow.

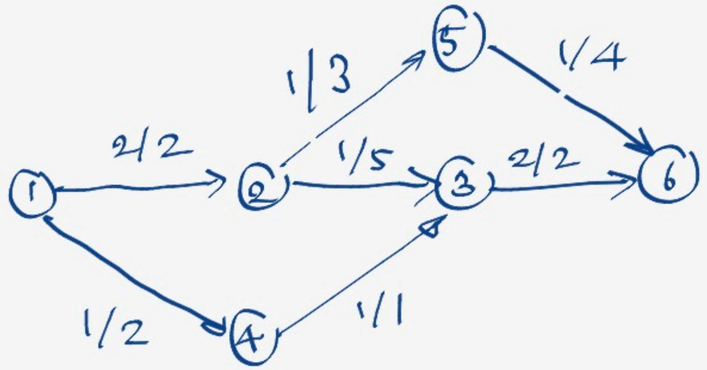

Solution

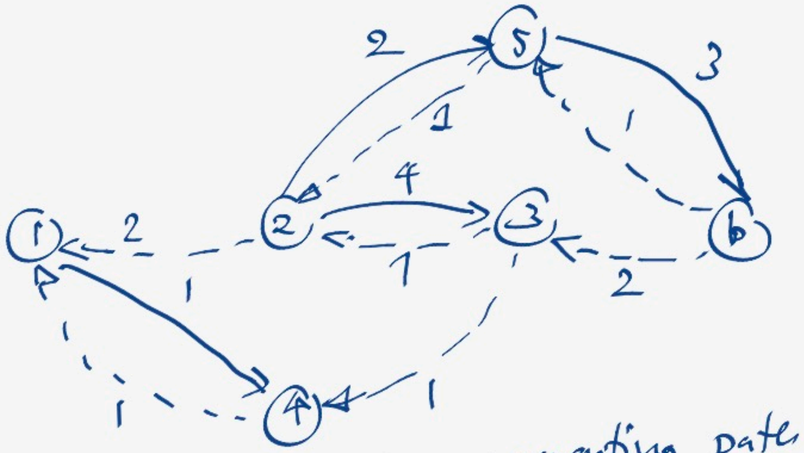

Augmenting path. 1 – 4 – 3 – 2 – 5 – 6

δ = 1

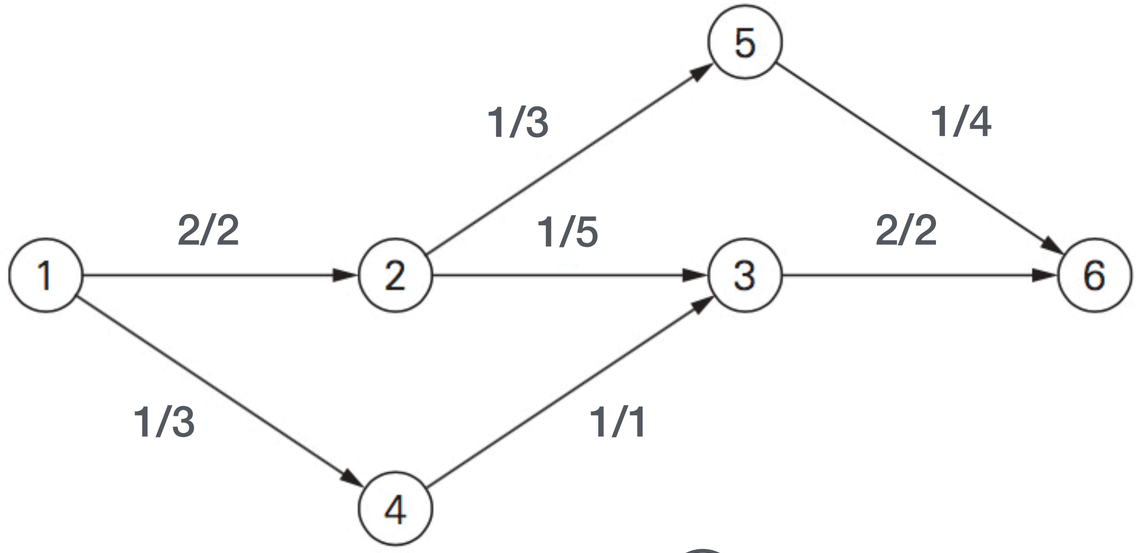

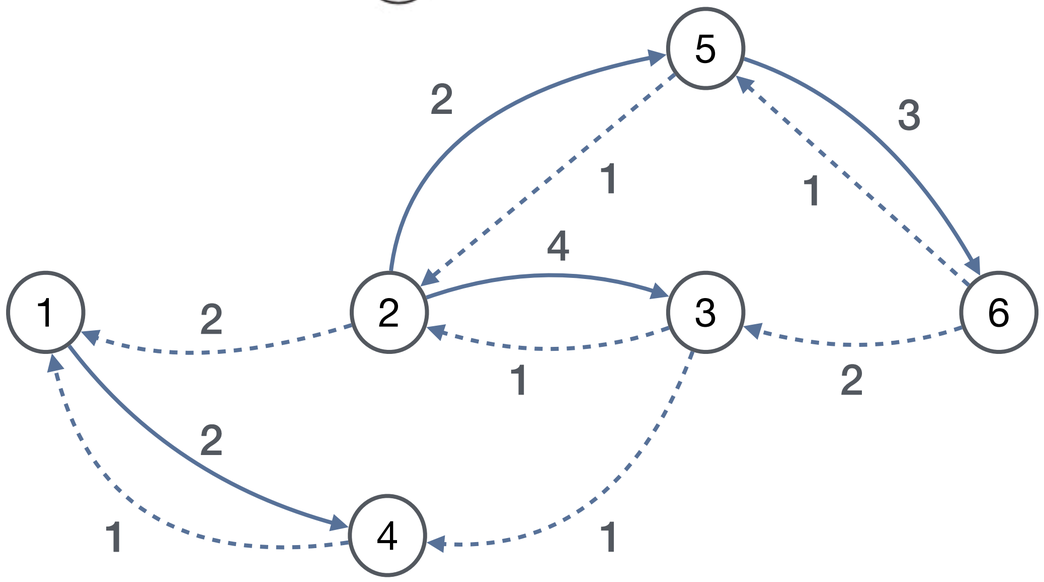

No augmenting path

Max flow = 3

Solution

No augmenting path
Max flow value = 3

Termination. All paths from s to t are blocked by either a

- Full forward edge (x/x)
- Empty backward edge (0/x)
